Education

Brigham Young University | 4.0 GPA

August 2022 - April 2028

- Expected graduation **April 2028**
- B.S. in Computer Science, minor in Math
- Coursework: software design, systems programming, algorithm design, web programming

Mountain View High School | 4.0 unweighted GPA

August 2018 - June 2022

- National Merit Finalist, Math Excellence Award, Eagle Scout
-

Technical Experience

Lucid Software | Software Engineering Intern

May 2026 - August 2026

- Built and released a full-stack platform allowing **700 sales representatives** to demo product capabilities, improving representative satisfaction with demo ability by 50%
- Collaborated with a Scrum team to deliver a data processing pipeline deployed on AWS that retrieves data across 16 microservices to efficiently copy, clone, and delete multi-user accounts
- Mitigated **15+ internal issues** by participating in support on-call rotations
- Voted best hackathon project at company-wide hackathon for a project allowing users to use AI to create personalized persistent features in the product

Tech stack: Scala, Angular, Typescript, Terraform, AWS, SQL

Brigham Young University | Research Assistant

September 2025 - May 2026

- Fine-tuned public ML models to assign actionable intents to natural language for a networked game
- Developed a parameterized conversational agent that uses chat-based intents to generate human-like decisions and messages

Tech stack: Python, Hugging Face API, PyTorch, React

SRI International | Software Engineering Intern

July 2023 - September 2023

- Extended a GUI and API used to interact with speech recognition, transcription and translation ML models at the [Speech Technology and Research department](#)
- Resolved **20+ compatibility issues**, added support for various languages and secure connections through TLS to fix longstanding complaints from customers

Tech stack: Python, Java, Git

Brigham Young University | Research Assistant

September 2022 - May 2023

- Developed a full-stack Flutter application with other students to act as a testbed to train AIs to model group behavior, published at [IJCAI-24](#)
- Organized and carried out over 20 user studies to support Ph.D. research

Tech stack: Dart, Flutter

Other Experience

Volunteer Missionary in Viña del Mar, Chile | September 2023 - August 2025

- Oversaw and coordinated missionary efforts of **30 missionaries** covering areas of Chile
- Achieved professional Spanish fluency while serving the local community and congregations

Peery Piano Academy Lead Teacher | June 2019 - August 2022

- Taught children aged 5-14 techniques and skills necessary to play piano
-

Skills

Tools: AWS services (Lambda, S3, DynamoDB, SQS), Firebase, Hugging Face libraries, SQL, Git

Languages: Python, Scala, Typescript (React, Angular, Vue), Java, C/C++, Dart (Flutter)
